5-2-1. Absolute Folder or File name	36
5-2-2. Folder or File name without folder path	

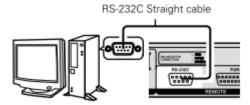

1. General

The Serial Remote control function is used by connecting the host machine such as PC to the device (our product). The host can control the device by sending the Control command, and the host can sense the current device status by sending the Status Request command. Two types of the connectivity, RS-232C and IP (Ethernet) is selectable. In addition, in this document, the controlled equipment is called the "Device" (our product) and the controlling equipment is called the "Host (PC etc.)".

1-1. RS-232C Control

The host can control the device by connecting the RS-232C straight cable to the D-sub 9 pins connector on the device surface as shown in the following diagram.

Figure 1-1 RS-232C Connection

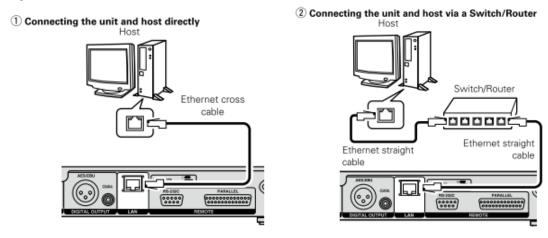

1-2. IP Control (Ethernet)

The host can control the device by connecting the Ethernet cable to the RJ-45 connector on the device surface as shown in the following diagram. (10BASE-T / 100BASE-TX)

Figure 1-2 IP Control Connection

[Three main features]

- 1. A device is controlled by a host.
- 2. A device sends status of the device to host by receiving the status request command from the host
- 3. Automatic ally a device sends status notification to the host to notify of the device status change

2. Specification

2-1. RS-232C Control

· Transmission type : Asynchronous / Full duplex

· Connector type : 9 pin D-sub female connector (Straight cable)

· Transfer rate: 9,600 / 38,400 bps Selectable (via "Serial Bit Rate" in the "System Setting" menu)

· Clock accuracy : < +/- 2.0%

Data length: 8 bits
Parity: None
Start bit: 1 bit
Stop bit: 1 bit
Flow Control: None

· Maximum data length: 600 Bytes (Start character to End character is included.)

Figure 2-1 Pin arrangement

Pin Number	Signal Name
1	GND
6	NC
2	TxD
7	RTS*
3	RxD
8	NC
4	NC
9	NC
5	S. GND

^{*5}V/500mA power supply can be used for RTS.

2-2. IP Control (Ethernet)

· Transmission type : Full duplex

· Transfer speed: 10 Mbps / 100 Mbps

· TCP port No. : 9030

· Maximum data length : 600 Bytes (Start character to End character is included.)

3. Communication Protocol

3-1. Packet Structure

A packet must be started with the Start Character '@' and terminated with the End Character '\r' (0x0D).

Figure 3-1Packet Structure

There are three kinds of packet, "COMMAND", "REQUEST", and "ANSWER /NOTIFICATION/ERROR".

3-2. ACK (Acknowledge) and NACK (Not Acknowledge)

The device sends ACK or NACK to a host according to the following table.

3-2-1. ACK [Acknowledgement]:

It is an affirmative reply sent to a host from a device. When data transfer completes properly, a device notify of that to a host.

3-2-2. NACK [Negative Acknowledgement]:

It is a negative reply sent to a host from a device. When data transfer does not complete properly, a device notify of that to a host.

Table 3-1 ACK and NACK

Name	Value (HEX)	Transmission Requirement
ACK	0x06	The device acknowledged that the command was received normally from the host.
NACK	0x15	 The device received the End Character '\r'(0x0D) before receiving the Start Character '@(0x40)'. The device does not receive ID'0(0x30)' just after Start Character'@(0x40)' The device receives an unknown character just after Start Character '@ (0x40)' and ID'0 (0x30)' The device receives an unknown command just after Start Character '@ (0x40)' and ID'0 (0x30)'. Parameter is out of range. The size of data is abnormal. 5msec passed before the device receives the next code necessary to complete the command.

3-3. Communication Rules

3-3-1. Initiative of Communication

In the communication between a host and a device, the host must have the initiative. However, the Status Information notification automatically from the device is an exception.

When the device receives a command from the host, the device returns the following.

• When receiving the command which doesn't require a status information ACK

• When receiving the command which requires a status information ACK + Status information (ANSWER)

• For the communication failure or an unknown commands etc.(Refer to Table 3-2): NACK

3-3-2. Communication Sequence

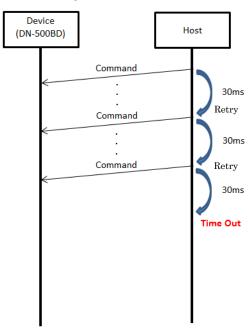

The host must not send any new command after the previous command before the host receives ACK or NACK, or the timeout (see "3-3-3 Timeout") has expired.

3-3-3. Timeout

After a host sends a message to a device, the host waits for a reply from the device for 30 ms(IP Control)/300 ms(RS-232C). When the host does not receive a reply over 30 ms(IP Control)/300 ms(RS-232C) from the device, the host sends the same message to the device. However, when the host does not receive a reply from the device after sending the same message 3 times (that means Tim Out), the host sends End character '\r' (0x0D) to the device. After that, the host should execute the recovery process such as retry.

Figure 3-3 Time Out

3-3-4. ACK

Refer to "3-2-1 ACK [Acknowledgement)".

3-3-5. NACK

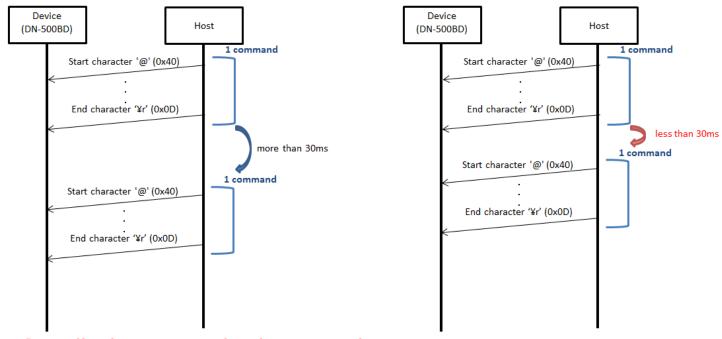

The device returns a NACK immediately after detecting a failure in the communication with the host (see ("3-2-2 NACK [Negative Acknowledgement)"). If the host receives a NACK, it must stop sending the current remaining command immediately and execute the recovery process such as retry.

3-3-6. Command Interval time

- Interval time between Characters from a host must be less than 5ms. The device sends NACK when 5msec passed before the device receives the next character code.
- Interval time between Commands is more than 30ms.

Figure 3-4 Interval time between each command

In case of less than 30ms as interval time between commands,

- 1) Executing the subsequent command is not guaranteed.
- 2) When there are buffer spaces of a device for a command, the device will execute the command.
- 3) When there is no buffer space of a device for a command, the device does not execute the command, and will send Busy (@0BDERBUSY) to the host instead.

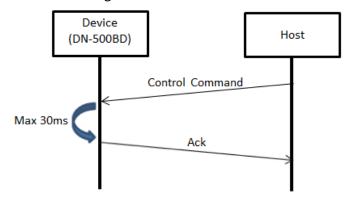

3-4. Basic Control Flow

3-4-1. Device Control Flow

The device sends the host an ACK (Acknowledgement) and executes that command when the device receives a Control command from the host. The list of the Control command is shown in "Control Command List".

Figure 3-5 Device Control Flow

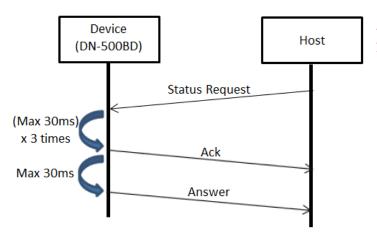

If the device receives an unknown command or an End Character '\r' (0x0D) without a Start Character '@', it causes transmission failure and the device returns a NACK (Not Acknowledgement). Refer to "3-2-2 NACK [Negative Acknowledgement)" about NACK transmission condition.

3-4-2. Status Request Flow

The device returns an ACK and the ANSWER requested by the host when the device receives the Status Request from the host. The list of the Status Request and the corresponding answer is shown in "Status Request List".

Figure 3-6 Status Request Flow

When a device receives Status Request from a host, the device sends an ACK to the host. After that, the device gets the current status, and then sends it to the host.

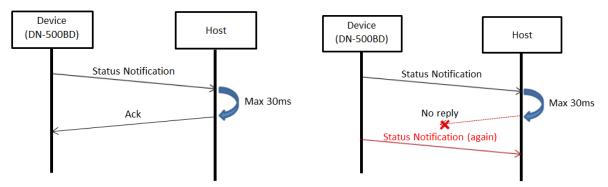

If the device receives an unknown command or an End Character '\r' (0x0D) without a Start Character '@', it causes transmission failure and the device returns a NACK (Not Acknowledgement). Refer to "3-2-2 NACK [Negative Acknowledgement)" about NACK transmission condition.

3-4-3. Status Notification Flow

A device notifies of Status Information listed in "Status Information List" whenever the status of the device is changed, such as the transport status, the current track, the storage media status, and other status.

Figure 3-7 Status Notification Flow

A device sends Status Notification to a host. The host replies ACK to the device. The device waits for the ACK for Max 30ms. When the device does not receive the ACK from the host, the device sends the same Status Notification to the host again. After that, the device does not send the same Status Notification even if it does not receive an ACK from the host.

The Status Information is same as the answer for the Status Request listed in "Status Request List".

4. Command Table

Italic characters of command mean parameter. (Ex: Frame "@0frXX\Yr" -> Parameter: XX)

*Note- "Track" means "Chapter" during the DVD or BD playback. "Group" means "Title" (DVD or BD playcak) and "Folder" (USB and other Playback).

4-1. Control Command/ Status Request Command List

4-1-1. Key Control

#	Function	Command/Response	Status	Description	
1	Stop	@02354	-	Stop	
2	Play	@02353	-	Play	
3	Play Pause	@02348	-	Playback is Paused	
4	Track/Chapter Jump	@0Tr <i>nnnn</i>	-	nnnn: Track No ('0001'-'2000')	
5	Track/Chapter Jump Next	@02332	-	Track skip forward	
6	Track/Chapter Jump Prev	@02333	-	Track skip reverse	
7	Group/Title Jump	@0PCGp <i>nnnn</i>	-	nnnn: Group/Title No ('0001'-'2000')	
8	Group/Title Jump Next	@0PCGPNX	-	Group/Title skip forward	
9	Group/Title Jump Prev	@0PCGPPV	-	Group/Title skip reverse	
10	Lock Panel's Key	@023KL	-	Key lock front panel	
11	Unlock Panel's Key	@023KU	-	Key lock front panel buttons.	
				Toggles "IR Remote Lock" setting.	
40	ID Last		@ 00 DOIDLIK	XX: IR Lock On/Off	
12	IR Lock	@0PCIRLKXX	@0?PCIRLK	'00': IR Lock on.	
				'01': IR Lock off.	

13	Set A for A-B Repeat (On the fly)	@0PCRPAF	-	Sets A point for A-B repeat
14	Set B and Start Repeat for A-B Repeat (On the fly)	@0PCRPBF		Sets B point, and starts A-B repeat.
15	Exit A-B Repeat	@0PCEXRP	-	Exits A-B repeat
				XX: On/Off
16	Program Mode	@0PCPMPXX	@0?PCPMP	'00': On
				'01': Off
				The reply message from device to host, the status command massage should be
				@0PCPMRXYY
			@0?PCPMR	X: Shuffle or Random
		@0PCPMR		'S': Shuffle, 'R': Random
17	Random Mode			YY: Mode
				'OF': Off
				'SI': Sub Item
				'IT': Item
				'AL': All
				XXXX: Time Mode Code
				'TL': Total Elapsed,
18	Time Mode Code	@0PCTMDXX	@0?PCTMD	'TR': Total Remain,
				'EL': Elapsed,
				'RM': Remain,
18	Hide OSD	@0DVHOSD <i>XX</i>	@0?DVHOSD	Complete hiding of the icon displayed on the screen.
10	Tilde OOD	© OD VIIOODAX	SO: DALIOSD	XX: On/Off

				'00': OSD on.	
				'01': OSD off.	
19	Setup Menu	@0PCSU	-	Shows Setup menu.	
20	Top Menu (Disc Menu)	@0DVTP	-	Playback title menu in the disc.	
21	Option Menu	@0DVOP	-	Playback option menu.	
22	Pop Up Menu	@0DVPU	-	Shows Pop Up Menu in the disc.	
23	Return	@0PCRTN	-	Return to the previous setup menu screen in the BD/DVD disc.	
				Selects dialog in the BD/DVD disc.	
24	Audio Dialog	@0DVADLG <i>X</i>		X: Audio stream code	
24	Audio Dialog	@UDVADLGX	-	'+': Primary	
				'-': Secondary	
				Selects subtitle language in the BD/DVD disc.	
25	Subtitle	@0DVSBTLX	-	X: Subtitle stream code (DV04: Fixed to '1')	
				'1': Primary.	
				Command: Forward the angle in the DVD disc.	
26	Angle	@0DVANGL+	@0?DVANGLX	Status: Return the angle No.	
				X: Angle No.	
27	Cursor	@0PCCUSRX	-	X: Moves highlight area of initial setting screen.	
	Guisoi			'1':Left, '2':Right, '3':Up, '4':Down	
28	Enter	@0PCENTR	-	Decides selected item in the setup menu screen, etc. in the BD/DVD disc.	

29	Disc Tray	@0PCDTRY <i>XX</i>	-	Controls Disc Tray. XX: Disc Tray Open/Close 'OP': Open 'CL': Close
30	Video Resolution (Specified resolution)	@0DVVR <i>X</i>	@0?DVVR	Changes the resolution of HDMI X: Resolution '1': Auto, '2': 480/576i, '3': 480/576P, '4': 720P '5': 1080i, '6': 1080P
31	Display/Info	@0DVDSIF	-	Shows information on screen display.
32	Function/Color	@0DVFCLR		Carries out a function peculiar to a disc. X: Color '1':Red, '2':Green, '3':Blue, '4':Yellow
33	Mode/Option	@0DVMO	-	Change PIP mode cyclic.
34	Home	@0PCHM	-	Shows HOME menu screen of the unit.
35	Ten Key	@0PCTKEYX	-	Inputs 0-9 X: Number '1': 1, '2': 2, '3': 3, '4': 4, '5': 5, '6': 6, '7': 7, '8': 8, '9': 9, '0': 0
36	Slow/Search	@0PCSLS <i>d</i> s	@0?PCSLS <i>d</i> s	d: Direction 'F': Forward s: Search Speed 'f': fast 's': slow

				XX: On/Off
37	MUTE	@0mtXX	@0?mt	ʻ00': Mute on.
				'01': Mute off.

4-2. Error message

The following error message commands are sent from the device when an error occurs in the device.

# Title Command Parameter Description		Title	Command	Parameter	Description
---------------------------------------	--	-------	---------	-----------	-------------

1 Error message @0BDERBUSY - There is no space of buffer for a command.

5. Appendix

5-1. Acceptable Character

The acceptable character set is ISO/IEC 8859-1.

5-1-1. Acceptable Character Type1

• Acceptable characters are shown in Table 5-1. (The characters that are colored in gray are not acceptable.)

Table 5-1-1 Acceptable Character

	X0	X1	X2	Х3	X4	X5	X6	X7	X8	X9	XA	XB	XC	XD	XE	XF

5-2. Folder name/File name

5-2-1. Absolute Folder or File name

Folder name or File name must be specified in full-path from the root folder. (Root folder is expressed in 0x2F ($^{\prime}$?) of the top, and the separator is 0x2F ($^{\prime}$?).)

Ex) Folder name: /NewFolder, File name: /NewFolder/NewFile.wav

5-2-2. Folder or File name without folder path

Folder name or File name is specified without folder path.
